Bank Card Printing

Configurable Hardware

Video Conference Compatible

Smart ID Scanner

The I64A, also known as the Smart Teller Machine (STM), is an intelligent banking terminal designed to provide seamless migration from mundane counter transactions to a self, assisted or remote service platform. The STM can automate transactions like opening a bank account, issuing a new bank card, applying for a loan, changing of particulars and much more! Migrating such services not only reduce customer queue and processing times, but also improves the efficiency of your branch tellers.
